```
//What is the purpose of the "Applied Steps" pane in Power Query?
```
It keeps track of any changes that are made to the base table that was imported into power bi down to what type of file is imported and from where.
```
//How do you remove duplicate rows in Power Query?
```
Home Transfrom data
then in Home menu again youc can choose remove rows and select remove duplicates
```
//What does the "Filter" icon do in Power Query?
```
It is used to clean up data in the report like removing unnecessary time frames or show only one season, it also let's you choose what kind of data you wish to keep by each column
```
//How would you rename a column from "CustID" to "CustomerID"?
```
You can do it simply in Table view menu by opening context menu on the column name and manually changing it there or with M CODE
```
    #"Renamed Columns" = Table.RenameColumns(#"Changed Type",{{"CustID", "CustomerID"}})
```
```
//What happens if you click "Close & Apply" in Power Query?
```
